

First Revision No. 2-NFPA 101A-2025 [Global Input]

Revise all worksheets by updating all NFPA 101A and NFPA 101 references to read as follows: "(For use with NFPA 101A-2028/NFPA 101-2027)"

Submitter Information Verification

Committee: SAF-ALS

Submittal Date: Tue Jun 10 14:00:25 EDT 2025

Committee Statement

Committee Statement: The revision updates the NFPA 101A/NFPA 101 worksheet references to the applicable editions.

Response Message: FR-2-NFPA 101A-2025

First Revision No. 3-NFPA 101A-2025 [Section No. 1.3.1]

1.3.1*

This guide consists of a number of alternative approaches to life safety. Each chapter is a different system independent of the others and is to be used in conjunction with the 2024 2027 edition of NFPA 101.

A.1.3.1

The mandatory values presented in worksheets in the various fire safety evaluation system (FSES) chapters are calibrated to measure safety against the provisions of the most current edition of NFPA 101, which, in the case of this 2025 2028 edition of NFPA 101A, is the 2024 2027 edition. The spreadsheets used to calculate the mandatory values serve as a record of the safety parameters and associated point values determined by the technical committee as the baseline required by the ~~Code~~ code. The spreadsheets are maintained in the permanent committee files at NFPA headquarters, serve as the historical record, and are consulted when each new edition of NFPA 101 is published to determine what mandatory values need further calibration.
